

SARPO

API Documentation

REST API specification for the SARPO e-commerce platform.

Base URL: <https://api.sarpo.uz/api>

Version 1.0 | March 2026

Contents

1. Overview
2. Products
 - 2.1 GET /products
 - 2.2 GET /products/:id
 - 2.3 GET /products/recommended
 - 2.4 GET /products/new
3. Collections
4. Hero Slides
5. Cart (Server-side)
6. Orders
7. Contact
8. API Summary Table

1. Overview

This document describes the REST API endpoints required for the SARPO e-commerce frontend application. The API follows standard REST conventions, uses JSON for request/response bodies, and supports filtering, sorting, and pagination for product listings.

Base URL

`https://api.sarpo.uz/api`

Authentication

All endpoints requiring authentication should use Bearer token authentication via the Authorization header: Authorization: Bearer <token>

Response Format

All responses are in JSON format. Successful responses return HTTP 2xx status codes. Error responses include an error object with message and code fields.

2. Products

Endpoints for managing and retrieving product information.

GET `/products`

Retrieve a paginated list of products with filtering, sorting, and search capabilities.

Query Parameters

Parameter	Type	Required	Description
<code>search</code>	string	No	Search by product name (partial match)
<code>collection</code>	string	No	Filter by collection. Values: Весенняя коллекция, Летняя коллекция, Осенняя коллекция, Зимняя коллекция. Multiple values comma-separated.
<code>isNew</code>	boolean	No	Filter products marked as new (Новинки)
<code>category</code>	string	No	Filter by product category
<code>priceMin</code>	number	No	Minimum price filter (default: 0)

priceMax	number	No	Maximum price filter (default: no limit)
sort	string	No	Sort order: newest, price-asc, price-desc, popular
page	number	No	Page number (default: 1)
limit	number	No	Items per page (default: 20)

Response

```
{ "products": [ { "id": "1", "name": "Cable Knit Jumper Dress", "price": 35.99, "image": "/images/ai-generated/product_blue_grey.jpg", "images": ["/images/...1.jpg", "/images/...2.jpg"], "category": "Women's Tops", "collection": "Осенняя коллекция", "isNew": true, "description": "Product description..." } ], "total": 12, "page": 1, "limit": 20 }
```

GET /products/:id

Retrieve a single product by its unique identifier.

Response

```
{ "id": "1", "name": "Cable Knit Jumper Dress", "price": 35.99, "image": "/images/ai-generated/product_blue_grey.jpg", "images": ["/images/...1.jpg", "/images/...2.jpg", "/images/...3.jpg"], "category": "Women's Tops", "collection": "Осенняя коллекция", "isNew": true, "description": "Full product description..." }
```

GET /products/recommended

Get recommended products for the homepage display.

Query Parameters

Parameter	Type	Required	Description
limit	number	No	Number of products to return (default: 10)
excludeId	string	No	Exclude a specific product ID (for product detail page)

GET /products/new

Get new arrivals (products with isNew=true) for the Новинки section on the homepage.

Query Parameters

Parameter	Type	Required	Description
<code>limit</code>	number	No	Number of products to return (default: 10)

3. Collections

Retrieve available product collections for navigation and filtering.

GET `/collections`

Get the list of all available product collections.

Response

```
[ { "id": "1", "name": "Весенняя коллекция", "slug": "vesennyyaya" }, { "id": "2", "name": "Летняя коллекция", "slug": "letnyaya" }, { "id": "3", "name": "Осенняя коллекция", "slug": "osennyyaya" }, { "id": "4", "name": "Зимняя коллекция", "slug": "zimnyaya" }, { "id": "5", "name": "Новинки", "slug": "novinki" } ]
```

4. Hero Slides

Slides for the homepage hero carousel.

GET `/hero-slides`

Get all hero slides for the homepage carousel.

Response

```
[ { "id": "1", "image": "/images/hero_three_women.jpg", "title": "SARPO - Baxt ulashamiz!", "subtitle": "Toshkent bo'ylab keng tarmoqli...", "order": 1 } ]
```

5. Cart (Server-side, Optional)

These endpoints are optional. The frontend currently stores cart state on the client side (Zustand). Server-side cart storage enables cross-device persistence and session recovery.

GET **/cart**

Get the current user's cart contents.

POST **/cart/items**

Add a product to the cart.

Request Body

```
{ "productId": "1", "quantity": 2 }
```

PUT **/cart/items/:productId**

Update the quantity of a cart item.

Request Body

```
{ "quantity": 3 }
```

DELETE **/cart/items/:productId**

Remove a product from the cart.

DELETE **/cart**

Clear all items from the cart.

6. Orders

Create and manage customer orders.

POST **/orders**

Create a new order from the cart contents.

Request Body

```
{ "customer": { "name": "Ivan Ivanov", "phone": "+998901234567", "address":  
  "Tashkent, Amir Temur 1" }, "items": [ { "productId": "1", "quantity": 2 }, {  
  "productId": "5", "quantity": 1 } ], "paymentMethod": "payme", "totalPrice":  
  101.98 }
```

Response

```
{ "orderId": "ORD-20260301-001", "status": "created", "paymentUrl":  
"https://payme.uz/checkout/...", "totalPrice": 101.98 }
```

Payment Method Values: payme, uzum, click

7. Contact

Contact form for reaching the operator.

POST /contact

Submit a contact request to reach an operator.

Request Body

```
{ "name": "Ivan Ivanov", "phone": "+998901234567", "message": "I want to  
check product availability..." }
```

Response

```
{ "success": true, "message": "Your request has been sent. An operator will  
contact you shortly." }
```

8. API Summary Table

#	Method	Endpoint	Description	Required
1	GET	/products	List products (filter, search, sort)	Yes
2	GET	/products/:id	Get single product	Yes
3	GET	/products/recommended	Recommended products	Yes
4	GET	/products/new	New arrivals (Новинки)	Yes
5	GET	/collections	List collections	Yes
6	GET	/hero-slides	Hero carousel slides	Yes
7	GET	/cart	Get cart contents	No
8	POST	/cart/items	Add to cart	No
9	PUT	/cart/items/:productId	Update cart quantity	No

10	DELETE	/cart/items/:productId	Remove from cart	No
11	DELETE	/cart	Clear cart	No
12	POST	/orders	Create order	Yes
13	POST	/contact	Contact operator	Recommended

Legend:

Required = Minimum endpoints needed for frontend to function

No = Optional (cart is stored client-side by default)

Recommended = Should implement for better UX
